June 27th 2017

## Requirements

- Android Device with Android 7.0 (Target API Level 25) – does not work with the emulator, because of the /emulated/storage path
- Images in your library
- Valid licence of the PhotoEditor SDK – the current included one will expire on July 17th 2017

## Features

## Using CLEX

1. Select images from your library on your device
2. Edit your image, if you want
3. Choose royalty free music, if you want (currently not working, due to muxing problems)
4. Done! Your video will be exported to your videos

## Download
